Re: Window Cleaning Update

WTI has been in contact with the Sponsor in connection with Window cleaning. We are pleased to confirm that the Sponsor intends to have all apartment and hallway windows cleaned by a professional window cleaning company.

Although in the past window cleaning was not provided by Management, window cleaning will now be provided at no cost to all residents as the final step in the window installation process.

Management is in the process of bidding out the window cleaning job with professional window cleaning contractors and will let residents know when the cleaning will be done, which will commence as soon as a contractor is selected and available to start. The entire job will take approximately 4-6 weeks to complete.

In the future, we (or the new COOP Board once in place) will work with Management to establish a procedure for periodic window cleaning for residents to sign up for window cleaning – the cost of this service will be based on the size of the apartment.

In the past, residents often made arrangements for staff to clean apartment windows after hours on a fee basis. Because of legal and insurance reasons, staff are not permitted to perform window cleaning, including after hours.
